

Bed of nails

Do you dare?

This bed may only be used by one person at a time!

Lie flat on the surface with your head on the pillow.

Press your head down on the pillow (there is a safety switch under the pillow that must be depressed).

Pull the lever to raise the nails to lie on them.

You won't feel any pain when your entire body weight is supported by hundreds of nails.

Although you feel the pressure of the many nail tips, each nail only has to support a small portion of your body weight. The pain threshold is about 1 kg per nail tip. In this nail bed, the weight per nail tip is only one tenth of that value.
